CAREER OBJECTIVES

Aspiring Technical Consultant with a strong foundation in backend architecture (C/C++, DBMS) and web development. Passionate about problem-solving, navigating the Software Development Lifecycle (SDLC), and translating complex technical requirements into efficient, user-centric solutions.

EDUCATION

Maulana Azad National Institute of Technology, Bhopal <i>Master of Computer Applications</i>	2025 – 2028 <i>CGPA: 8.10</i>
Lucky Institute of Professional Studies, Jodhpur <i>Bachelor of Computer Applications</i>	2022 – 2025 <i>Percentage: 83.7%</i>

TECHNICAL SKILLS

Core Fundamentals: Object-Oriented Programming (OOP), Operating Systems (OS), Database Management (DBMS)
Languages: C, C++, JavaScript, PHP, SQL
Web Technologies: HTML5, CSS3, TailwindCSS, Node.js, React, Express
Tools & Methodologies: Git, VS Code, Software Development Lifecycle (SDLC), Agile Methodologies, Antigravity

PROJECTS

VisualDS <i>HTML5, CSS3, JavaScript, Node.js</i> GitHub	Jan 2025 – Mar 2025
- Identified the need to simplify abstract computer science concepts for students and developed an interactive web platform to visualize core Data Structures and Algorithms. - Implemented dynamic operations (insertion, deletion, searching, traversals) with real-time animations to provide instant visual feedback on algorithm mechanics. - Designed an intuitive, responsive user interface with technical explanations, successfully improving the educational experience for end-users.	
Journey Junction <i>HTML5, JavaScript, PHP, MySQL</i> GitHub	Jan 2024 – Mar 2024
- Architected and developed a responsive travel web application focusing on efficient data storage and seamless client-side interactions. - Designed a robust relational database schema using MySQL, optimizing backend operations and SQL queries for reliable data retrieval. - Built user-friendly interfaces bridging backend logic with front-end usability, demonstrating end-to-end application development capabilities.	
Dotlify <i>HTML5, CSS3, JavaScript, TailwindCSS</i> GitHub	May 2025 – May 2025
- Built a web application for generating unlimited email aliases, prioritizing a clean, responsive, and client-friendly user interface. - Leveraged modern ES6+ JavaScript features and TailwindCSS to design reusable components, ensuring optimal frontend performance across various devices.	

CORE COMPETENCIES

- Strong analytical and problem-solving skills, with a deep understanding of system architecture and data models.
- Ability to translate technical documentation into practical applications and client-focused solutions.
- Quick learner with a strong aptitude for adapting to new frameworks and effective technical communication.
